IN THE CLAIMS

Claim 1 (Amended).

A multi-colored, sheeted chewing gum product with a top and bottom surface, comprising:

a first mass of chewing gum formed in a generally flat sheet; and

a plurality of second masses of a confectionery product having a different color than the first mass, [which] each second mass [is] being smaller than the first mass, and [which] each second mass [is] being embedded in the first mass so as to be visible with the first mass from the top surface of the chewing gum product;

"wherein the second masses are not visible from the bottom surface of the chewing gum product."
